### Other qualification, if any(give details)

### Other Details

<b>Currently studying [Inte.]MSc</b>	Year II	<b>Semester III</b>	
<b>Institution</b>	Pondicherry University	<b>Place</b>	Puducherry
<b>Have you applied previously to Academy Fellowships? If yes mention year and Reg No.</b>	NO		
<b>Have you been selected previously? If yes, (a)mention year, name of the guide and subject</b>			

area (b) A letter of recommendation from the previous guide should be directly sent by the guide to the academy	NO
---	----

**Are you now in receipt any other fellowship: Yes/No. If Yes: Specify name of the fellowship and year**

NO

**Training / projects undertaken,if any (give details)**

**Extra-curricular activities, if any**

Playing Hockey Learning about technology

**Any other information**

<b>Names of Guides with whom you would like to work</b>	FL622	Dr P. Senthil Kumar	NGRI, Hyderabad
	FL2439	Dr M. Ravi Kumar	NGRI, Hyderabad
	FL2591	Dr Ramananda Chakrabarti	IISc, Bengaluru
	FL2164	Dr Vineet Gahalaut	Ministry of Earth Sciences, New Delhi
	FL1538	Dr V. Ramaswamy	NIO, Dona Paula, Goa
	FL1187	Prof. Anupam Chattopadhyay	UOD, Delhi

**Suggested dates convenient for the applicant to work**

May To Jul

**A write-up (not exceeding 150–250 words) as to the specific area of interest of the applicant and what he/she would like to learn and achieve through this fellowship. It can also include the specific experiment or theory that the applicant wants to work on but NOT a general description of the area.**

As a student of Earth Sciences, I have come across many interesting topics. This semester I studied Structural Geology. I gained a basic understanding regarding the significance of this field of geology in explaining rock deformation behaviour and development of various geological structures. Among the topics I studied, structures developed due brittle deformation especially fault fascinated me much. I understand that the mechanism of faulting has immense societal impact since various natural hazards such as earthquake and tsunami are the result of the release of the strain associated with faulting. Through this fellowship programme I am keen to learn in detail the mechanisms of rock failure preferably using some experiment. This will enable me to enhance both my knowledge and interest in this area as I wish to pursue my career in Seismology and Tectonics.

**Declaration:** I affirm that the information given above is correct. I have carefully read all the "Instructions to Applicants" given under SRFP-2016 as mentioned on the websites of the three Academies and shall abide by the same.
